

AEROPENTA

PROFILE

www.aeropenta.com

AEROPENTA is an aircraft asset management and parts solutions organization based in Dubai, United Arab Emirates.

WHO WE ARE

AEROPENTA is the choice of organizations for aircraft Asset management solutions, CAMO support, Borescope inspection, Non-destructive inspection, Aircraft spare parts and components trading.

Originated as a vision of highly experienced and diversified aviation professionals to strengthen and support the goals of the UAE as a global aviation hub.

OUR COMMITMENT

With the rapid growth in the transport business, aircraft maintenance and its related services are crucial to ensure the safety and airworthiness of aircraft or aircraft components. Our obligation is to ensure a timely, safe, cost-effective service.

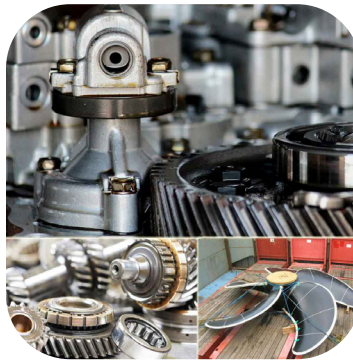

OUR MISSION

To guarantee high-quality products and nurture customer relationships to become our client's number one choice. We aim to assure the timely delivery of high-quality and reliable products, develop customized solutions with competitive pricing and establish client-focused ethical business practices.

ASSET MANAGEMENT

✔ Physical inspections / Management of records audit

- ✔ On-site Technical Representatives for Airlines, Lessors, lessees & MROs. Comprehensive records review and physical inspection of the airframe, engines, APU's & landing gears. Our technical records specialists will collect, review and consolidate all essential aircraft records and documentation and put together a full document package in paper and in digital form for our customers.

✔ Aircraft delivery / Re-delivery & Interim management

- ✔ Liaising with lessor and operator to ensure a smooth and efficient process. Technical and financial asset management consideration.

✔ Aircraft transitions

- ✔ Aircraft end-of-life support service.

BORESCOPE

Provide EASA / FAA / GCAA release certification with highly qualified and experienced Engineers available globally.

- ✔ We offer Borescope inspection for the Aircraft Engine and APU with our latest Mentor Visual 3D Equipment combined with highly skilled Inspectors.
- ✔ This means greater safety and more time that an engine can operate on a wing without costly and time-consuming teardown and unnecessary maintenance.

- ✔ Using state-of-the-art equipment, we provide a full video borescope with comprehensive and unbiased reporting along with EASA / FAA / GCAA release and have the capability to carry out on-wing and off-wing inspections on a scheduled or an AOG basis globally.
